## OUR PLEDGE:

We at **Greenfield Care Center of Fullerton** would like to share with you our unique philosophy of patient care. We believe in affordable quality care, superior attentive services, choices and options.

Your medical needs will be met by the attending physicians as well as our Medical Director.

Your nursing needs will be met by our Nursing Department

Our Dietary Department will meet your nutritional needs by closely following physician's orders. Our Food Services Supervisor will discuss likes and dislikes with each patient or family. Our Nurses Aides are carefully trained to assist Residents with their meals in the dining room or in the Resident's room should that be the Resident's preference.

**Our philosophy** is to encourage and stimulate our Residents to take part in activities but never to force it on them. They can participate in as much as they want or as little as they choose.

We will care for personal and spiritual needs and encourage our Residents whenever medically allowed to be up, groomed and properly dressed.

We know that the first few weeks are a transition period to the resident and his/her family and friends, and it may be helpful to participate in a support group of friends, and family members with similar concerns. We believe in hiring first class employees who share our enthusiasm of delivering the best care to our Residents.

### **Recreational Activities**

The needs and interests of every resident are important. These needs and interests are used to tailor daily activity programs. At **Greenfield Care Center of Fullerton**, routine social activities include coffee and news updates, exercise and relaxation programs. For residents with special needs, focused activities are planned to enable residents to complete tasks. In addition, our social service professionals design and implement behavior management programs for use at home and away **Greenfield Care Center of Fullerton**.

### **Rehabilitation**

Our extensive rehabilitation services emphasize achievement. Each resident's recovery potential is assessed and goals for improvement are established. Our rehabilitation program is exclusively provided by **EVA CARE INC.** and consists of physical therapy, occupational therapy and speech-language pathology. Each therapist is properly trained and certified in their field of specialty.

### **Physical Therapy**

Physical Therapy is mainly to assist residents and patients to achieve their maximum functional mobility skills. Individualized treatment programs are designed to alleviate pain, correct deformities, prevent disability, and restore functional ability to the highest level.

### **Occupational Therapy**

Occupational Therapy concerns with persons' performance in activities necessary for daily life, and provides specialized services that enhance the abilities of individuals to perform and to achieve satisfaction in their daily occupations. Programs are individually designed to assist them to reach the highest independent level in all daily living skills.

### **Speech Therapy**

Speech-Language Pathologists conduct evaluation and implement individual treatment programs for residents and patients with speech, language, and swallowing disorders. Communication skills are enhanced and techniques to ensure safe swallowing are taught.
